- Subcontractor, Supplier or Distributor Audits
- Auditor Training
- Inspection Readiness
- Desktop/Remote Audit

AUDIT SERVICES

GForce Life Sciences works with pharmaceutical, medical device, and diagnostic organizations to achieve certification and compliance to requirements specified by the FDA and other global regulatory authorities.

Pharmaceutical/Biotechnology:

GMP, GCP, GCLP, GLP, ISO 9001, ISO 17025, QSR, FDA 21 CFR

Medical Device/Diagnostics:

GMP, ISO 9001, ISO 13485, ISO 14971, ISO 17025, QSR, FDA 21 CFR, EU MDR, IVDR, IEC and MDSAP

As you know, noncompliance can impact the effectiveness of your processes, the quality of your products, and lead to the loss of certification or even a product recall.

In-depth Quality Management System (QMS) audits are the best tool for discovering how well your processes (and those of your suppliers) perform. These QMS audits go beyond surface findings to examine process interactions and efficiency. They give your company a clear view of what is happening and the information you need to improve overall performance.

Why do many companies choose to outsource some (or all) of their internal or supplier audits?

Objective assessments. GForce Life Sciences auditors provide a fresh, external view of your processes. We can also augment your in-house team when you need auditors independent of the area to be audited.

Specialized expertise. Draw on a network of specialists in industry-specific standards and relevant regulations. Our auditors have a minimum of 15 years of industry experience.

Value-added audit findings. Our auditors provide an in-depth assessment of your company's processes, identifying strengths and weaknesses. If there are nonconformances, these auditing experts can help you develop and implement effective corrective action.

If you would like to schedule a meeting to learn more about our services and to determine if GForce can help you, please contact us today.
